PROFILE

I am a full-stack software engineer who relies on his analytical and interpersonal skills to deeply understand client requirements and deliver clean, well-tested, and highly scalable software, as well as clear and concise communication experiences.

With a growth mindset and an industrious and adaptable approach to work and collaboration, I thrive in dynamic and fast-paced environments.

EXPERIENCE

SOFTWARE CONSULTANT, COMPOSITIONAL IT – LONDON, UK – 2019-2021

My Role: As a software consultant at Compositional IT, I collaborated directly with both the more senior members of the team, and the software departments of world-class corporations and start-ups, in tight-knit agile environments to provide software solutions to day-to-day problems in both legacy and greenfield projects.

During this time, I acquired hands-on experience throughout the entire lifecycle of full-stack web applications – all the way from the planning phase to deployment and continuous integration cycles.

Tech Stack: .NET Framework/.NET Core (Saturn), Fable, Elmish, Microsoft SQL Server, and Azure (DevOps, App Service, Storage, Active Directory).

PORTFOLIO

You can find the projects listed below as well as the blog posts I wrote on a variety of technical topics on my personal website at www.alicandev.com. Please refer to the *readme* document of each repository for additional information on any given project.

GOTEAM! – KANBAN BOARDS

Description: A Django-REST project with a React frontend and a PostgreSQL database, which I built to demonstrate my ability to develop web APIs in Python. The result is a kanban boards application that allows admins to assign tasks to members, granting them limited edit rights.

Live Demo: <https://www.goteam.online>

GitHub Repo: https://www.github.com/alicandev/portfolio_goteam

BLAZIN PIZZA CO. – BESPOKE PIZZAS

Description: A MERN Stack application (MongoDB, Express, React/Redux, Node.js) that I built in an effort to pour all of my JavaScript knowledge into a single coherent project. It simulates the workflow of a pizza store application where both guests and members can place orders online.

Live Demo: <https://www.blazinpizza.co>

GitHub Repo: https://www.github.com/alicandev/portfolio_blazin-pizza-co

GITHUB FINDER – USER CONTENT SEARCH

Description: A React application that incorporates two different APIs (GitHub Search and OpenStreetMap) to allow its users to search through GitHub profiles and browse their repos, gists, followers, following, and location as well as the content thereof.

Live Demo: <https://www.githubfinder.icu>

GitHub Repo: https://www.github.com/alicandev/portfolio_github-finder

LANDING PAGE – DEVELOPER PORTFOLIO

Description: The landing page of my developer portfolio itself is a React application. Even though it fundamentally is a static website, I chose this approach to give myself even more of an exposure to React, since React is my default choice when it comes to frontend development.

Live Demo: <https://www.alicandev.com>

GitHub Repo: https://www.github.com/alicandev/portfolio_landing-page

EDUCATION

I am entirely self-taught. However, I completed numerous LinkedIn Learning courses on programming related topics, the certifications of which you can find on my LinkedIn profile. Though this serves me as a solid foundation, the majority of my knowledge comes from in-depth docs/hands-on learning, and extensive research. I kindly encourage you to visit <https://git.io/J3rXh> to view my *learning* repositories.

SKILLS

Programming Languages:	Python, JavaScript/TypeScript, C#, F#, HTML, CSS, and Sass.
Frameworks and Libraries:	Django (Django-REST), React/Redux, Node.js (Express), ASP.NET (MVC, WebAPI, Saturn), Elmish, and Fable.
Database Administration:	PostgreSQL, MongoDB, MS SQL Server, and SQLite.
Cloud Platforms:	Microsoft Azure (DevOps, App Service, Storage, Active Directory), *Amazon Web Services, and *Google Cloud Platform.
Soft Skills and Traits:	Interpersonal and presentational skills, critical thinking, time management, extroverted and outgoing personality, excellent written and spoken English, friendly outlook, stellar work ethic, and adaptability.

** Limited capability, but a keen interest to explore.*
